EDUCATION

Bachelor of Science in Computer Science • Technical University of Munich, 10/2025 - Present
Munich, Germany

- **Relevant Coursework:** Introduction to Software Engineering, Fundamentals of Computer Architecture (performance track: low-level optimization in C, cache locality, bitwise operations), Algorithms and Data Structures, Introduction to Computer Architecture (RISC-V/Assembly), Introduction to Programming & Lab (Java, polymorphism, basic unit testing), Discrete Structures, Linear Algebra

Bachelor of Science in Software Engineering • Kharkiv National University of 08/2023 - 02/2025
Radio Electronics, *Kharkiv, Ukraine (Remote)*

- Fundamentals of software engineering, core computer science structures and object-oriented programming

Feststellungsprüfung (German university qualification exam, T-course) • 08/2023 - 01/2025
Studienkolleg Bochum, *Bochum, Germany*

- **Subjects:** Mathematics, Physics, German, Chemistry

Certificate of Complete General Secondary Education • OPTIMA Online 09/2020 - 05/2022
Gymnasium, *Kyiv, Ukraine*

Certificate of Basic General Secondary Education • Lyceum for Physics and 09/2012 - 05/2020
Mathematics No. 27, *Kharkiv, Ukraine*

PROJECT EXPERIENCE

Humanitarian Drone Development & Manufacturing • Independent Project 02/2025 - Present

- Programming custom Lua scripts in INAV flight controller firmware to control mechanical release servos via radio remote control
- 3D design of functional parts in FreeCAD and manufacturing-optimized 3D printing
- Hardware integration of an FS-iA6B receiver via a TTL-to-USB adapter on Linux to use the real remote control in a flight simulator

Real-Time Climbing Timer • Independent Team Project (3 People) 08/2024 - Present

- Independent development of firmware in C++ using the ESP-IDF framework for direct, low-level control of the ESP32 chip
- Fixed audio playback issues by implementing task scheduling at the FreeRTOS level
- Hosted a local web server on the ESP32 via Wi-Fi; programmed the web UI with real-time data transfer over WebSockets
- Collaborated within the team on physical assembly and functional field tests; sole responsibility for the codebase

Cloud Storage Backend Prototype (own-drive) • Independent Project **04/2024 - 02/2025**
(Inconsistent Development Stage)

- Originally developed in Java / Spring Boot; later fully rewritten in Go (Golang) to reduce boilerplate code
- Implemented token-based authentication and simple chunked uploads over HTTP

Local Desktop File Manager Prototype (fzfexplorer) • Independent Project **09/2024 - 02/2025**

- Developed a desktop user interface with Electron (JavaScript) in a Nautilus-style design
- Interacted with the local file system via the Node.js fs API and integrated drive-list for partition detection

Full-Stack Framework Evaluations (Expense & Book Tracker) • Independent Practice Projects **11/2023 - 02/2024**

- Built a trial expense tracker with Angular, DaisyUI (Tailwind CSS), Spring Boot and PostgreSQL
- Built a trial book-tracking app with React on the frontend and Spring Boot / PostgreSQL on the backend

Setup & Administration of Local Server Infrastructure • Independent System Project **08/2024 - Present**

- Configured and maintained a headless Debian mini-PC within a local home network via SSH terminal connections
- Set up a PostgreSQL database as a background service (systemd) to provide a local data layer for programming experiments

INVOLVEMENT

Membership • Gesellschaft für Informatik e.V. (German Informatics Society, GI) **10/2025 - Present**

- Ongoing theoretical development through the Informatik Spektrum journal

SKILLS & COMPETENCIES

Languages: Ukrainian (native), Russian (native), English (C2, Cambridge Certificate), German (C1, Feststellungsprüfung / FSP)

IT Skills: JavaScript, Go (Golang), Java (Spring Boot), C++, C, C#, OCaml, Assembly (RISC-V), Lua, HTML5/CSS3, WebSockets, AJAX, PostgreSQL, Arch Linux / Debian administration, systemd, Git, MS Office

AI: Using LLMs (Claude/Gemini) for code optimization, refactoring and analysis of complex runtime bugs

Soft Skills: Analytical thinking, self-directed work style, problem-solving skills, teamwork, adaptability
